Area leaders enlist in Connected program to bridge technology gap, boost economy, and pave way for improved quality of life

Indianola, IA – Indianola community leaders have enrolled their community in an innovative program that seeks to boost the local economy and quality of life for residents through increased access, adoption, and use of broadband.

Iowa Association of Regional Councils (IARC) and staff from Connect Iowa, the statewide nonprofit promoting broadband expansion, led area leaders through the steps of the new [Connected](#) community certification program that offers a comprehensive and localized way for communities to bridge the digital divide impacting many communities.

The Indianola *Connected* community leadership team recently met to begin building a plan to ensure that every home, school, organization, and business in the county has access to broadband.

Several local leaders are already involved in the project. The committee is part of Iowa's plan to deliver broadband access to every part of the state. Ultimately, the goal of the *Connected* community certification program is to increase the number of high-tech companies and jobs in Iowa, and ensure schools have access to the quality of broadband required to deliver the best educational resources available through the Internet.

The team will assess the current state of technology in the county, determine what improvements are needed, and devise a plan for achieving those goals.

Community members interested in the project are welcome to join future meetings. Volunteers represent the following areas:

- Business and industry
- Healthcare
- Libraries
- K-12 education
- Higher education

- Community-based organizations
- Government
- Agriculture
- Tourism, recreation and parks

The meetings are organized by IARC and Connect Iowa, a nonprofit group that is working to accelerate the availability and use of technology throughout the state towards creating a better business environment, more effective community and economic development, improved healthcare, more efficient government, and enhanced education.

Chelle Klootwyk with Indianola Municipal Utilities is excited to see the opportunities for technological progress that the *Connected* process will bring. She said: "We are excited to be a part of this important initiative that will put our citizens on the information superhighway. As our world becomes increasingly technology-driven, we want Indianola recognized for its efforts and investments. The *Connected* community certification process will help us achieve that recognition. Technology opens the door to create a better business environment, more effective community and economic development, improved healthcare, enhanced education, and more efficient government."

The use of broadband technology is already enhancing the lives and businesses of citizens all across the state. In fact, Iowa businesses with broadband report an average of \$300,000 higher annual revenue than businesses without. Many companies cite the availability of broadband as essential to starting or expanding their operations. The Internet also allows small businesses, even those based in remote locations, to compete worldwide.

Broadband also promises to boost the economy and quality of life in Iowa. For example, doctors can remotely monitor patients with chronic illnesses, working parents can complete their college degrees by attending classes online, and residents can access government services like car registration, driver's license renewal, and voter registration.

For more information about the project or to join the *Connected* community technology team, please contact Connect Iowa at info@connectiowa.org, or Connect Iowa Program Manager Amy Kuhlert at (515) 421-2561.

**The next meeting of the Indianola *Connected* community technology team is set for:
9AM on Wednesday, June 27, 2012
Indianola Municipal Utilities, 111 South Buxton, Indianola, Iowa 50125**

###

About Connect Iowa: Connect Iowa is a subsidiary of Connected Nation and operates as a nonprofit in the state of Iowa to promote broadband access, adoption, and use. The Iowa Economic Development Authority (IEDA) is leading the initiative to increase broadband Internet access throughout rural Iowa. Connect Iowa was commissioned by the state to work with all broadband providers in Iowa to create detailed maps of broadband coverage and develop a statewide plan for the deployment and adoption of broadband.
